

# JOSÍAS RODRÍGUEZ TEJADA

## JUNIOR FULL STACK DEVELOPER | PHP BACKEND DEVELOPER

Santiago de los Caballeros, Dominican Republic | +1 809 901 4229 | [rodriguezjosias@gmail.com](mailto:rodriguezjosias@gmail.com)  
[josiasrodriguez.dev](https://josiasrodriguez.dev) | [github.com/josiasrodri-dev](https://github.com/josiasrodri-dev) | [linkedin.com/in/josiasrodri](https://linkedin.com/in/josiasrodri)

### PROFESSIONAL SUMMARY

Junior full stack developer with hands-on experience building PHP, Laravel, JavaScript, MySQL, and REST API applications for client-directed and academic projects. Developed authentication, CRUD workflows, relational data models, inventory and invoicing features, and responsive interfaces. Combines backend-focused development with complementary visual design and motion graphics skills.

### TECHNICAL SKILLS

**Core:** PHP, Laravel, JavaScript, HTML5, CSS3, MySQL, SQL, REST APIs

**Additional:** C#, Flutter, Java, Git, GitHub, responsive design, relational database design

**Creative:** Adobe Illustrator, Photoshop, Animate, After Effects

### RELEVANT EXPERIENCE

#### Independent Software Developer | *Client-Directed Projects*

Summer 2024 - Apr 2026

- Built a desktop agricultural invoicing system from client requirements, covering authentication, product inventory, stock updates, invoice creation and reprinting, discounts, payment methods, invoice history, and database backup/restore.
- Developed Floralia independently with PHP 8.3 and Laravel 13, implementing authentication and protected CRUD workflows for plants, plots, crops, and harvest records with linked relational entities.
- Translated operational requirements into application flows, database structures, validation rules, interfaces, and user documentation while preserving client confidentiality in private repositories.

#### Refrigeration Technician Assistant | *OFFNI Home Solution S.R.L.*

Aug 2025 - May 2026

- Assisted with on-site installation and technical service work, coordinating tasks and troubleshooting equipment in customer environments.

### SELECTED PROJECTS

#### Developer Portfolio | **Personal Project** | Jul 2026 | [Live](#) | [Code](#)

- Built a responsive vanilla JavaScript SPA with custom client-side routing, ES Modules, bilingual localization, persisted preferences, and Vercel deployment.

#### Mil Delicias | **Academic Project** | PHP, JavaScript, MySQL

- Created a functional cafeteria management system with PHP session authentication, employee roles, table and customer management, digital menu, shopping cart, orders, status tracking, and CRUD operations. MVC refactor is planned and paused.

#### PhotoGallery | **Academic Project** | Flutter, PHP, MySQL, REST API

- Integrated a Flutter application with a PHP backend to manage clients, albums, and photographs, including CRUD workflows and shareable album links.

### EDUCATION

**Professional Technician in Multiplatform Application Development** | Pontificia Universidad Católica Madre y Maestra

Sep 2024 - Apr 2027  
(Expected)

### LANGUAGES

Spanish: Native | English: B1
